Quarterly Market Review
Fourth Quarter 2015

Quarterly Market Review

Fourth Quarter 2015

This report features world capital market performance and a timeline of events for the past quarter. It begins with a global overview, then features the returns of stock and bond asset classes in the US and international markets.

The report also illustrates the performance of globally diversified portfolios and features a quarterly topic.

Overview:

Market Summary

Select Country Performance

Fourth Quarter 2015 Index Returns

In US dollar terms, there was wide dispersion in country returns across both developed and emerging markets countries. New Zealand recorded the highest country performance in developed markets, while Spain and Canada returned the lowest performance for the quarter. In emerging markets, Indonesia and Hungary posted the highest country returns, while Poland and Greece posted the lowest. China, which had previously dominated news headlines, recorded one of the highest returns in emerging markets.

Commodities

Fourth Quarter 2015 Index Returns

Commodities had mostly negative performance in the fourth quarter. The Bloomberg Commodity Index Total Return fell 10.5%. The energy complex again led the decline with heating oil falling 31.1%. WTI crude oil declined 23.4%, while natural gas fell 22.0%.

Sugar was the strongest performer with an 18.3% increase. Soybean oil was also among the stronger performers, increasing by 10.6%.

The index declined 24.7% during 2015. Cotton was the only commodity to post positive returns for the year.

Fixed Income

Fourth Quarter 2015 Index Returns

Interest rates across the US fixed income markets increased in the fourth quarter. The yield on the 5-year Treasury note gained 39 basis points to end the quarter at 1.77%. The yield on the 10-year Treasury note increased 22 bps to 2.27%. The 30-year Treasury bond added 14 bps points to finish with a yield of 3.01%.

The short end of the yield curve experienced the largest increase in yields during 2015.

Short-term corporate bonds declined 0.14% during the quarter but gained 1.01% for the year. Intermediate-term corporates fell by 0.42% during the quarter but climbed 1.08% in 2015.¹

Short-term municipal bonds returned 0.08% for the quarter and 1.21% for the year. Intermediate-term municipal bonds returned 1.26% for the quarter and 3.28% for the year.²

Growth of Wealth: The Relationship between Risk and Return

The Rise of Short-Term Rates

Fourth Quarter 2015

While many market participants were waiting for the “inevitable” rise in short-term interest rates which were expected when the Federal Reserve tightened its monetary policy, some investors may have missed the increase in short-term rates already underway as a result of market forces.

Looking at the zero- to two-year segment of the yield curve—the segment that many believe will be most affected whenever the Fed “normalizes interest rates”—it may be surprising to see how much rates have increased since 2013.

In fact, the yield on the 2-Year US Treasury note has nearly doubled since the beginning of 2015, rising from 0.45% in January to almost 0.90% in late November.¹ The yield on the 1-Year US Treasury note more than tripled, from 0.15% to more than 0.50% over the same period. The 6-Month US Treasury bill’s yield rose from a low of 0.03% in May to over 0.30% in late November. Yet, despite the higher rates, we have not experienced the conjectured financial storm in the fixed income market.

The question of how far the Fed will go in raising its overnight target rate is still open. Similarly, we can ask ourselves a more complex question: Will the market lead the Fed or is the Fed leading the market through setting expectations?
